ORGANIZATIONAL REQUIREMENTS FOR INTELLIGENCE SUPPORT

This regulation prescribes the services and support provided by the Directorate of Intelligence as well as the responsibilities of Space Division (SD) offices that require intelligence information.

Responsibilities:

a. SD/IN will:

- (1) Coordinate intelligence matters between SD and the intelligence community at large.
- (2) Manage the Aerospace Corporation analysis efforts in support of the intelligence program within SD.
- (3) Present intelligence briefings.
- (4) Publish threat assessments on foreign capabilities, achievements, and objectives in support of SD efforts.
- (5) Participate in SD planning efforts to ensure that the threat environment is properly considered for those efforts which require threat inputs.
- (6) Establish and maintain data handling systems to acquire, store, retrieve, and disseminate intelligence publications and data.
- (7) Identify, document, and submit requirements for the collection and production of intelligence.

Supersedes SDR 200-1, 21 May 1982.
(See signature page for summary of changes.)

Distribution: F;X:

HQ AFSC/IN . . . 2

(8) Provide Special Security Office (SSO) and Intelligence facilities and specialized support to SD and other DOD authorized activities according to DOD directives to include:

- (a) Communications
- (b) Courier Service
- (c) Administrative support
- (d) Storage
- (e) Personnel security processing and support
- (f) SCI industrial security oversight

(9) Provide Sensitive Compartmented Information (SCI) graphics support.

(10) Provide support to SD and other Agency offices according to existing Memoranda of Agreement (MOA).

(11) Coordinate and maintain liaison regarding Counterintelligence matters with the Counterintelligence Advisor to Space Division (CSI) to ensure a multidisciplined approach to intelligence support is maintained.

b. System program, project, task and study managers will:

- (1) Provide system description of their program to SD/IN.
- (2) Request SD/IN assistance to determine and document kind, scope, and level of intelligence data details required by their program, as specified in AFSCR 200-3.

(3) Designate a single point of contact to work with SD/IN for acquisition of intelligence data to document program office intelligence requirements.

(4) Coordinate with SD/IN on all activities, reports, briefings, work statements, studies, or plans which include threat or intelligence data or require the development of intelligence or threat scenarios or projections.

(5) Process contractor requirements for classified foreign intelligence according to AFR 205-2

and regulations governing Sensitive Compartmented Information (SCI). Requests for contractor visits to the intelligence data bases must be approved by government contracting personnel prior to submission to SD/IND.

(6) Advise SD/INS of personnel data required by AFR 35-36 (medical reports) and security regulations, as appropriate.

Director of Administration

SUMMARY OF CHANGES

This revision establishes policy for system description information (para b(1)) and personnel data required by AFR 35-36 and security directives (para b(6)) to be provided SD/IN. It fixes SCI classification management as a responsibility of SD/IN (para a(10)) and delineates liaison with SD/CSI on counterintelligence matters (para a(11))
